

The Caixin flash China general manufacturing PMI plunged to a 77-month low of 47.1 in August from 47.8 in July. The sub-index on manufacturing output retreated to a 45-month low of 46.6 in August from 47.1 in July, according to the survey of Caixin Media Co., Ltd last Friday. The above indexes indicated that China's economy is still in the process of bottoming out, and the worries are casting a shadow to market sentiment, commented by economists.

In the week ending Aug. 28, 2015, China market for imported recovered paper appeared stable, though under inactive transactions and list price for the bulk grades from different origins staying mostly flat from the previous week.

**Recovered Paper ex USA. ....**

**Recovered paper ex Japan. ....**

**Recovered paper ex Europe. ....**

**China market for domestically generated recovered paper ....**
